

300 ROPE MOP SKIMMER

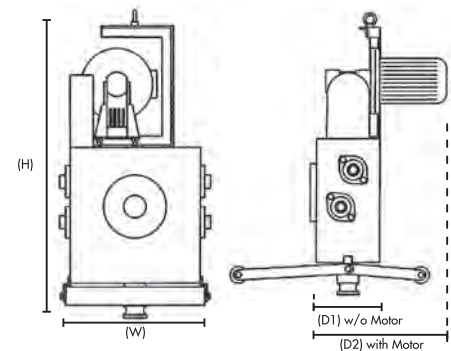

300 ROPE MOP SKIMMER

The DRIZIT 300 Rope Mop Skimmer removes floating oils from separators, sumps and tanks at a rate up to 300L/ hour. It is compact, reliable and easy to operate, being driven by 220v, 380v, 500v or air motor.

The oil attracting rope is driven through the skimmer by rubber coated rollers which squeeze the oil via a pipe to the separating tank which ensures water is returned to the separator and only pure oil is recovered.

The skimmer will recover mineral, vegetable and animal oils.
